STRETCH FILM PRINTERS

A highly profitable business idea: printing customized logos on stretch film for secure packaging and strong brand visibility.
Our flexographic stretch film printer is efficient, versatile, and world-leading in output.
It supports solvent and water-based inks, printing up to 4 colors on ultra-thin 10-micron film.
With speeds up to 400 m/min and 24/7 operation, it ensures stable adhesion and consistent quality.
Simple process, attractive margins (~40%), and easy integration into existing workflows.
Requires minimal staff, no specific skills needed.

FEATURE	DETAILS
Printing principle	Flexo with central drum
Colors	1–4 (1–2 common, 3–4 optional)
Printing speed	Up to 375–400 m/min
Film compatibility	Ultra-thin down to 10 microns
Operation	Continuous 24/7
Ink types	Solvent-based & water-based
Output (500 mm / 16 kg rolls)	~10 rolls/hour; ~80 rolls/shift
Space required	16 – 48 m^2
Power supply	32 – 58 kW
Compressed air	10 L/min
Staff	1 operator, no specific skills
Consumables	Ink, solvent, stretch film
